

Chapter 0

- Documentation
 - What is appropriate documentation (common knowledge)
 - Forum
 - Slack
 - The internet (in general)
 - What is not common knowledge
 - Getting a specific answer from a classmate
 - A specific blog / writeup of a machine
 - Direct copying
- IPs
 - Students - 10.11.0.0/16 except 10.11.1.0/24 (do not scan)
 - Public Labs - 10.11.1.x/24
 - Megacorpone.com
- Hints
 - Student Control Panel
 - Crackpot!
 - Forum
 - IRC (minimally useful)
 - Eachother (20 minutes stuck on exercises, 40 minutes on labs)
- Kali
 - Do no update until after complete exercises (Java)
 - SNAPSHOT!
- Lab Behavior
 - Shared VMs - be polite
- Notes
 - Keepnote is great.
 - Shutter (apt-get install shutter) is kali version of sniping tool
 - Use google drive to more back and forth

Chapter 1 (RTFM pages 5-9 [linux], 15-17 [windows])

- Help
 - Tab complete!
 - Man <command>
 - <command> --h, --help
- Find, locate, which (your path \$PATH), updatedb
 - Find based on group? User? Permissions?
 - Find -name, find -user, find -group, find -perm, find -exec
 - `find directory -user root -perm -4000 -exec ls -ldb {} \;` >/tmp/filename
- Systemctl, service
 - SSH (copy files via scp)
 - Simple python http (python -m SimpleHTTPServer 8000)
- Wget, curl, curl -X "Post"

- Grep, grep -r, cut, awk, sort, unique
 - Grep -r, grep -v (not does contain), grep -A -B or -N (lines above, below, both)
 - Zgrep for compressed
- What does > or >> or < or | mean?
 - Stdin v stdout v stderr
 - 2>/dev/null
- Bash scripting
 - What is \$url?
 - What is for url in \$(cat list.txt)
 - Can do similar with `command`
- Cat, head, tail
- Chmod, useradd
- Networking
 - Ss vs netstat
 - Ip add v. ifconfig v. ipconfig

Chapter 2-2.2

Nc.

- nvlp (what does each do)
- -K
- Notice the command are different on windows then linux
- -e

Reverse vs Bind shells

- which is better based on firewalls and acl

Alternative callbacks

- <http://pentestmonkey.net/cheat-sheet/shells/reverse-shell-cheat-sheet>
